UID EXPERIMENT 6

AIM:

To design and compare different mobile app UI themes (Light, Dark, and Color variants) for a ride-booking application named **Glitz**, and evaluate user feedback on aesthetics and usability using GIMP.

PROCEDURE:

Step 1: Install GIMP

- Download and install GIMP from the official website.

Step 2: Create a New Project

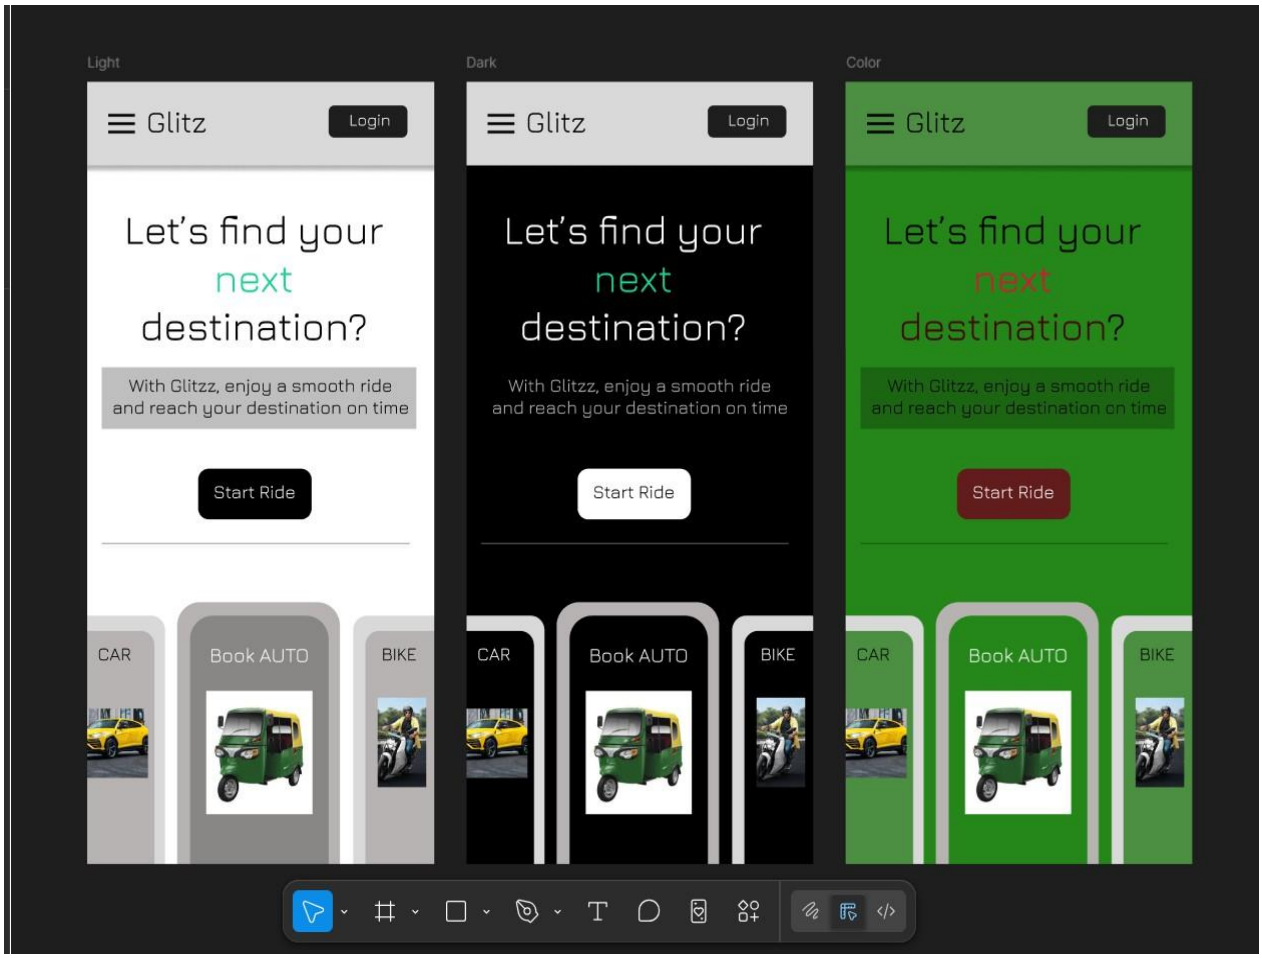
- Open GIMP
- Set Canvas Size: **1080 × 1920 pixels** (mobile screen resolution)

Step 3: Base Layout Design

1. **Divide Sections:**
    - Header (Menu + App Name + Login button)
    - Main Content (Tagline + Description + CTA button)
    - Service Section (Car / Auto / Bike options)
    - Use **Rectangle Select Tool** and **Bucket Fill Tool**
2. **Add UI Elements:**
    - **Text Tool:**
        - App Name: *Glitz*
        - Heading: *"Let's find your next destination?"*
        - Description: *"With Glitz, enjoy a smooth ride and reach your destination on time"*

- **Buttons:**
  - Login
  - Start Ride
- **Service Cards:**
  - CAR
  - Book AUTO
  - BIKE (with images)

3. **Layer Organization:**
   - Header
   - Menu Icon
   - Login Button
   - Title Text
   - Description Text
   - Start Ride Button
   - Service Cards (Car, Auto, Bike)



Step 4: Create Colour Variants

1. **Duplicate Layouts:**
    - Create three versions:
        - **Layout 1: Light Theme**
            - White background, black text, simple UI
        - **Layout 2: Dark Theme**
            - Black background, white text, minimal glow
        - **Layout 3: Green Color Theme**
            - Green background with contrasting red/black elements
2. **Edit Colours:**
    - Use **Bucket Fill Tool / Colorize Tool**
    - Adjust button colors and text contrast
3. **Export Layouts:**
    - Layout1.png (Light)
    - Layout2.png (Dark)
    - Layout3.png (Color/Green)

Step 5: Collecting User Feedback

Method:

- Shared all three UI designs with users
- Asked feedback based on:
    - Visual Appeal
    - Usability
    - Readability
    - Colour Preference

USER FEEDBACK:

Layout 1 (Light Theme):

- Clean and simple design
- Easy to understand layout
- Suggestions:
    - Improve contrast
    - Add depth to buttons (shadow, elevation)

Layout 2 (Dark Theme):

- Modern and stylish look

- Good for night usage
- Issues:
  - Slightly cluttered lower section
  - Tight spacing between elements
- Suggestions:
  - Increase spacing
  - Improve readability of cards

Layout 3 (Green Theme):

- Eye-catching and unique design
- Good spacing and structure
- Clear CTA buttons
- Feedback:
  - Looks professional
  - No major changes required
  - Suitable for branding

FINAL RECOMMENDATION:

Preferred Layout: Layout 3 (Green Theme)

Reason:

- Modern and visually attractive
- Better user engagement
- Balanced spacing and layout
- Clear readability and usability
- High overall user satisfaction

Step 6: Iterate and Refine

1. **Refinement:**
   - Improve button styles (rounded + shadows)
   - Maintain consistent spacing
   - Enhance contrast for accessibility
2. **Final Testing:**
   - Conduct another feedback round
   - Ensure:

- Smooth user experience
- Clear navigation
